

A NEW  
AND  
Prognostication

of this Year of our Lord  
God 1661.

Rules of Husbandry,  
*Being the first after Leap-year.*

of good consequence.

---

By

Gent.

---

Printed by R. & W. Leybourn, for  
the Company of Stationers,  
1661.

**The common notes and moveable Feasts**

according to the English, or old Account,  
For this year, 1661.

The Golden Number	9
The Epact	9
The Cycle of the Sun	18
The Domical Letter	B
Shrove-Sunday	24 February
Easter day	14 April
Rogation Sunday	19 May
Ascension day	23 May
Whitsunday	2 June
Advent Sunday	1 Decemb.

**Physical Observations.**

To let the Sanguine blood, when the Moon  
is in Pisces.

To let the Cholerick blood when the Moon  
hath her course in Cancer, or Pisces.

To let the Melancholy blood, when the  
Moon is in Libra, Aquarius, or Pisces.

To let the Flegmatick blood when the  
Moon is in Sagitarius or Aquarius.

parts thereof are governed by the Moon  
in the twelve Signes.

Y Head  
and face.  
Sneck &  
throat.  
B Brest  
Stomack,  
and ribs.  
W Bowels  
& Belly.  
M Secret,  
members.  
W Knees.

Arms &  
Shoulders.  
A Heart  
and back.  
Reines  
& loines.  
Thighs  
Legs.  
Feet.

and of the Aspects.

h Saturn, ♃ Jupiter, ♂ Mars, ☉ Sol, ♀ Venus,  
♀ Mercury, ☾ Luna, or the Moon.

♊ Conjunction, \* Sextile, □ Quartile,  
△ Trine, ☿ Opposition.

VENUS is a bright Morning Star from the begin-  
ning of the year, till Midsummer day, and from thence  
she becommeth a glittering Evening Star, and so continu-  
eth till after the end of this year.

*VIRTVS REDIVIVA*, or a Pan-  
gyrick on the late King *Charles* the first, of Blessed  
memory, with several ingenious pieces of the same  
Author *T. F.* in 8°. is to be sold by *W. Gran-*  
*ham*, at the black Bear in *S. Pauls Church* yard.

DADE. 1661.

## A PROGNOSTICATION

In which you may behold the state of  
this year of our Lord God 1661.

Having the Disposition of the four  
Seasons, the Eclipses, the Oriental and Oc-  
cidental Position of the Planets, with the  
increase and decrease of the Moon, and  
daily inclination of the weather.

Also certain Physical verses, and short  
Rules for Husbandry for every moneth  
throughout the year.

With other Notes of good  
consequences.

*Being the first from Bissextile or Leap-year.*

By WILLIAM DADE Gent.

LONDON,  
Printed by T. N. for the Company of  
Stationers, 1661.

**A Brief and necessary Rule, for the beginning  
and ending of the four Terms,  
with their Returns.**

Hillary Term begins *January 23.* and ends *February 12.* and hath four Returns.

Oftab. Hillarii. <i>Jan. 21.</i>	Craft. Purif. <i>Feb. 4.</i>
Quind. Hillarii. <i>Jan. 28.</i>	Oftab. Purif. <i>Feb. 9.</i>

Easter Term begins 17. days after Easter, and ends the Monday after Ascension day, and hath 5. Returns

DADE 1661.

A Description of the four Quarters of the year  
And first of Winter.

Sol in  $\nu$   $\approx$  X.

**W**inter Quarter after the Astronomers account) began the 10. of Decemb. 1660 and continues until the ninth of March this year 1661. at midnight; so that alway the first part of the Astronomical Winter is in one Politick year, and the latter end thereof is in the other. at which time was the shortest day of the year, by reason of the Suns greatest declination from the Equinoctial-Line.

The season of its own disposition is known to be cold and moist, contrary to the quality of the Summer, and in this Quarter, the inward parts of man are very hot, and being healthful, may receive plenty of Food, because natural heat is now comforted, and is gone inward, and there increased, and maketh digestion the better.

How the Weather will be therein disposed, is noted for each day throughout the Quarter.

The Sickneses that accompany this quarter, wherewith many will be grieved, are these, and such like, namely, Pain in the Stomach, Lasks of sundry sorts, Cathars, Scatiticaes, the Cholick and Black-Passion, Falling-Sickness, Diseases proceeding of

### A Prognostication.

rottenness and corrupt humors, thin Rheumes, Coughs, Head-ach, with others infirmities incident to women.

---

Of the Second Quarter of the year, called the Spring, Sol in  $\gamma$ .  $\delta$ . II.

**T**he Spring time (being the most pleasant and wholesome Season of the four) takes its beginning on Saturday the 9 day of March, at 12 at night, when the Sun entereth into the first minute of Aries, the Equinoctial point, making the days and nights of equal length, which quarter endeth the 11 of June, when the Sun entereth into Cancer.

This Season is naturally hot and moist, and is of the Sanguine complexion, being the most temperate and healthful time of the year, and is therefore accounted the fittest time to ease diseased bodies in, and to restore health again in those in whom formerly it hath been decayed by any kind of evacuation.

The particular condition thereof may be seen in the daily disposition of the season.

The Infirmities of this Quarter are Melancholly, Frenzy, Madness, Fluxes, the Falling-sickness, Bleeding at the Nose, Hoarseness, Coughs, Scabs, Agues, Cholick, Ring-Worms and Tetters, the Gout, paine in

D A D E. 1661.

In the joints, Plurisies, Shortness of Breath, Faintings, Burning Fevers, and others proceeding of corrupt blood.

---

Of the third Quarter of the year, called  
Summer, Sol in  $\mathcal{C}$ .  $\mathcal{A}$ .  $\mathcal{M}$ .

**S**ummer (the third quarter of the year Astronomical) taketh always its beginning at the Sun's entrance into the first degree of Cancer, which is this year on Tuesday the 11 day of June at 3 of the clock in the morning; at which time he makes his greatest declination towards the North, from the Equinoctial Line, and causeth the longest day, and shortest night in the year; and so Summer holdeth on till the 12 of September following.

The predominant qualities of this season (according to its proper nature) are heat and dryness, spreading the abroad in each part of the body.

As for the disposition of the weather, you may see in the daily inclination.

The Sickneses generally of this Season are, hot Fevers, Frenzies, Scabs, Pusles, Jaundies, Soar Mouth and Throat, with pains in the head and back, wherewith many will be molested.

### A Prognostication.

Of the fourth Quarter of the year, called  
Autumne, or fall of the Leaf,

Sol in  $\pm m \tau$ .

**A**utumne or Harbest (being the fourth  
and last Quarter of the year) beginneth  
on Thursday the 12. of September, at Sun-  
set, the Sun then making his entrance into  
the first minute of the Equinoctial signe Li-  
bra, working the same effect that he did at his  
entring into Aries; that is, making the days  
and nights of equal length, he rising at six in  
the morning, and setting at six at night, and  
this quarter doth last untill the eleventh of  
December following.

The quality of this season is naturally  
cold and dry, yet by the reason of its mata-  
bility, it is the most unwholsome, by means  
whereof it is more subject to sicknesses then  
any other, for the seeds of all Diseases of  
the former parts of the year will now burst  
forth and be seen.

How the Air is like to be inclined all Har-  
best, may be seen in the daily disposition of  
the Weather.

The Diseases of this Quarter are like to  
be many and dangerous, as Quartan fe-  
vers, the Strangury, Black Jaundies, Pe-  
gions, the falling Sickness, Opilations in  
the Spleen, difficulty of breathing, Con-  
vulsions, Dropsies, Scatiticaes, Equinancies,  
Biles

D A D E 1661.

Biles, Tooth ach, and many more, from  
which Good Lord deliver us.

Of the Eclipses.

**T**here will be four Eclipses this present  
year, namelz, two of the Sun, and two  
of the Moon, whereof the first of the Sun,  
and last of the Moon, may be seen in England,  
if the air be clear.

The first Eclipse is of the Sun, which  
will be conspicuous in our Horizon, upon  
Wednesday the 20. of March in the fore-  
noon.

The beginning whereof will be at 34 min.  
past 8. a clock in the morning.

The middle at 37. min past nine.

The end at 42. past. 10 so that the durati-  
on of this Eclipse is two hours, eight min.

The parts darkned are 7. and 10. minutes,  
so that the Sun will be above half eclipsed on  
his South side.

The second is an Eclipse of the Moon, up-  
on Thursday the fourth of April, at four a  
clock in the afternoon, to be seen in East India,  
in Java the great and less, and in the King-  
dom of Bengala, &c.

The third is of the Sun, upon Saturday  
the thirteenth of September, to be seen in A-  
frica the South, the Island of St Thomas,  
and in the remote Southern parts yet un-  
known to us.

### A Prognostication.

The fourth and last is of the Moon, on Saturday the 8. of September, which (if the aire be clear) will be seen in England.

The beginning at 1 a clock, and 41 min. in the morning.

The middle at 58 minuts past 2.

The end at 15. min. past 4.

Hence the duration will be 2 hours and 33 min. She being above half eclipsed on her North side.

---

Here followeth certain Physical verses, with a description how the Planets are placed in the Heavens, either before or after the Sun; whereby you may perceive how they keep their motions day and night. To which is annexed the time of the New, Full, and Quarters of the Moon; with the daily disposition of the weather. Also short Rules for Husbandry for every moneth throughout the year.

#### Of January.

**I**f thou be sick and help wouldst have,  
The counsel of the Learned crave:  
If thou hast health, to keep thee so,  
Fly idleness as deadly fo.

Saturn is South at Sun rise.

Jupiter is South-west at the same time.

Mars riseth a while before the Sun.

Venus (the morning-star) riseth at Day-break.

Mercury (near Mars) riseth after day appears.

The

DADE. 1661.

min. past 9. a clock at night.

The 25, 26 and 27. pleasant air.

The 28. and 29. fitting the season.

The 30 and 31 cold.

### Mays Instructions.

In the beginning of this month, you may  
sow the seeds of Summer herbs, which could  
not endure the cold of the forepassed months:  
You may yet sow Penny and Flax, weed your  
Hop-Gardens, and take away superfluous  
branches, and mow your Gardens.

### Of June.

**D**Rinks new or sweet, taste not at all,  
For thereby grows no danger small,  
And to thy self such past-time take,  
As may in God thee merry make.

Saturn

DADE 1661.

Saturn is almost South at Sun-set, at which time Jupiter is past the South.

Mars is North East at Sun rise.

Venus and Mercury attend upon their Royal Master the Sun.

The 1 day fair and windy.

Full Moon the 2 day (being Whit-Sunday) at 8, min. past 5. a clock in the afternoon.

The 2, 3, and 4. fair and windy.

The 5. and 6. warm.

The 7. and 8. something colder.

Last Quarter on Sunday, the 9 day, at 32. min. past 1. a clock in the afternoon.

The 9, 10, and 11. seasonable.

The 12. and 13. indifferent.

The 14 and 15. fair and good.

New moon on Sunday the 16. day, at 14. min. past 3. a clock in the afternoon.

The 16, 17 and 18. windy and dry.

rose-

D A D E. 1661.

Rosemary and Billy-Flowers, sow Nettlee,  
Shear Sheep, the Moon increasing.

Of July

**P**erfume thy house with savour sweet,  
But such as are for purpose meet :  
Abroad as thou in Streets doest go,  
Defend thy self from Stinks also.

Saturn is past the South at Sun-set.

Jupiter is South-west at Sun-set, and Mars  
to South-east at Sun rise.

Venus is near the Sun, and Mercury sets not  
long after h.m.

The 1 day indifferent fair.

Full Moon on Tuesday the 2 day, at 20 min.  
past 2 a clock in the morning

The 2, 3, and 4 some drops now and then.

The 5, 6 and 7 seasonable.

Last Quarter on Wednesday the 8 day, 53 min.  
past 6 a clock at night

The 8, 9 and 10 very warm.

The 11 and 12 fair and reasonable.

The 13, 14 and 15 clear and warm.

New Moon on Tuesday the 16 day, 36 min.  
past three a clock in the morning.

The 16, 17 and 18. good weather.

The 19 and 20 fair.

The 21, 22, and 23, mixt weather.

First Quarter on Wednesday the 24 day, at  
3 min. past 7 a clock in the morning.

The 24 and 25 cold windy aire

The

A Prognostication.

The 26, 27. and 28 warm.

The 29, 30 and 31 thunder.

Fall Moon on Wednesday the last day: at  
27 min. past ten a clock in the morning.

July's Instructions.

In this moneth ply your Haying, fallow  
your land for wheat, pull up Hemp that is  
ripe, get Rue and Wormwood to drive a-  
way fleas and pothes; dry flowers in  
the shade, and then sun them a little, for fear  
of corruption.

Of August.

**A**S burning heat Will thee destroy,  
So shivering cold will thee annoy.

Let little sleep thee now content,

Purge not, nor bleed, lest thou repent.

Saturn is South-West at Sun-set, at which  
time Jupiter is almost West.

Mars is South-east at Sun-rise.

Venus and Mercury set presently after the  
Sun.

The 1, 2 and 3 dayes, winde and clondes.

The 4, 5 and 6 sair and warme.

Last Quarter on Wednesday the 7 day at  
48 min. past 1 a clock in the morning.

The 7, 8 and 9 something hot.

The 10 and 11 good Harbest weather.

The 12 and 13 temperate.

New Moon on Wednesday the 14 day, at 11  
min. past 6 a clock in the afternoon.

DADE 1661.

The 14 and 15 faire.

The 16, 17 and 18 winde and cloudes.

The 19, 20, and 21 windes raising raine

First Quarter on Thursday the 22 day, at  
10 a clock at night.

The 22, 23 and 24 sudden showers.

The 25 and 26 better weather.

The 27 and 28 high windes.

Full Moon on Thursday the 29 day, 25 min.  
past 6 a clock at night.

The 29, 30 and 31 seasonable.

Augusts Instructions

Reap Wheat and Rye, cut downe your  
Dates, gather Garden-Seedes, sow Lettice  
and other Winter Herbs in the new of the  
Moon; use moderate diet, forbear to sleep  
presently after meat, take heed of sudden  
cold after great heat.

Of September.

**R**Aw fruit though ripe may sickness bring,  
Vnripe much eat, a dangerous thing.

If now a Surfet thou dost take,  
when others sleep thou must awake

Saturn is South-West- at Sun-set.

Mercury riseth a little before the Sun.

The 1 and 2 dayes cloudy, and haille.

The 3 and 4 cold and cloudy.

Last Quarter on Thursday, the 5 day, 9.  
min. past 11 a clock in the forenoon.

The 5, 6, and 7 some wind, but fair.

The

### A Prognostication.

The 8 and 9 indifferent,

The 10, 11 and 12 fair and temperate.

New Moon on Friday the 13 day, 56 min.  
past 10 a clock in the morning.

The 13, 14 and 15 fair and temperate.

The 16 and 17 apt for the season.

The 18, 19 and 20 cold and windy.

First Quarter on Saturday the 21 day, at  
24 min. past 10 a clock in the morning.

The 21 and 22 faire.

The 23 24 and 25 pretty good.

The 26 and 27 misty in the morning.

Full Moon on Saturday the 28 day, at 3 of  
the clock in the morning.

The 28, 29 and 30 dry winces.

### Septembers Instructions.

Set Artichokes, sow seeds for Winter-  
Herbs, gather Hops and Apples, and other  
Fruits (which are fit to be gathered) about  
the Full of the Moon, the weather being  
dry, cut quick-sets, sow Wheat and Rye,  
kill Bees, make Merjuice, sow Parsneps  
and Carrets, remove and set slips of flow-  
ers, set Roses, Strawberries, and Ber-  
berries, and remove young trees before New  
Moon till February.

D A D E. 1661.

Of October.

**W** Arme clothes must now provided be,  
Also warm meats are good for thee;  
Have good regard thy feet be dry,  
Thou shalt avoid much harm thereby.
